NEOXPacketLion NX-PBPL-1M
Monitor Multiple 100G Lines with 1G/2.5G/10G Analysis/Security Tools

MAXIMISE NETWORK VISIBILITY WITH OUR COST-EFFECTIVE AND INNOVATIVE PACKET BROKER PLATFORM!

48x 1G/2.5G/10G and **6x 40G/100G** or **12x 50G** or **24x 10G/25G**

Network Packet Brokers, also called Data (Network) Monitoring Switches, help you to intelligently manage your passively tapped network data and - through innovative technology - provide the analysis tools with the data packets reliably and in optimised form.

Media type and speed of your network do not matter, as these devices are equipped with SFP+ and QSFP28 connectors and process the data packets without affecting the active line and redistribute them according to your wishes.

By filtering out the data with hardware-based filtering mechanisms prior to rejection, this allows you to evaluate multiple 10G lines with existing 1G analysis tools, for example, while reducing the amount of data for hassle-free and secure analysis. Data that is not of interest is either discarded or sent to other tools for further analysis.

USE CASES

Aggregation of TAP/SPAN traffic in a central location to efficiently provide security and monitoring tools with the data.

Decide for yourself which network traffic you want to forward to which analysis system.

Intelligent load distribution of all data traffic according to the capacity of your connected monitoring systems.

Use the inline options of our PacketLions and simply connect several tools in series to increase your network security (can be combined with intelligent Load Balancing).

Regeneration of data traffic, for example to be able to provide the network data to several security systems in parallel.

Layer 2 matrix switch functionality for any interconnection of network data (many to one, one to many, many to many, any to any), easy media conversion through modular design (SFP+/QSFP28).

Intelligent filter rules let you sort out the network data to be analysed without loss and without interruption.

Enables to evaluate 1G/2.5G/10G/25G/40G/50G/100G network lines using 1G/2.5G/10G/25G/40G/50G/100G monitoring systems.
