NE₁ONE

OVERVIEW

The NE-ONE family provides the most complete and realistic network impairment library allowing you to easily mimic what happens in real-world networks. With more than 100 parameters to choose from NE-ONE combines realism and accuracy in a Software Defined Test Network that allows you to test applications over a range of controllable and repeatable scenarios. Furthermore, each impairment function has multiple parameters allowing you to customize its behavior for your specific testing needs. NE-ONE's impairments are frequently updated based on evolving networks and customer needs.

Gradual - Changes parameters gradually (linearly)	✓	✓
Variable - Changes parameters randomly	✓	✓
Outage - Creates an increasingly lossy network, followed by total loss, then comes back quickly but not instantly	✓	✓
None - Changes parameters immediately between scenarios	✓	✓
