

# NEOXPacketRaven Portable Singlemode Fiber TAPs

## QUICK USER GUIDE

### SecurITy

Trust Seal  
www.teletrust.de/itsmig

made  
in  
Germany

Our Singlemode Fiber Network TAPs are decoupling elements for the secure and reliable tapping of network data in optical networks. These TAPs are looped into the network line to be monitored and transmit the entire data traffic without interruption and without packet loss, while maintaining data integrity.

Using conventional SPAN ports, also known as mirror ports, on the other hand, can distort the result, as this copying process works in store-and-forward mode and, for example, discards FCS/CRC faulty packets on OSI layer 2 instead of providing these Ethernet frames to the security or monitoring tool.

Our Network TAPs do not have a MAC or IP address, but work entirely on OSI Layer 1 and cannot be traced in the network without special and expensive measuring equipment. Hackers and attackers therefore have no chance. As the integrity of the outgoing data remains unaltered due to this tapping method, our Network TAPs are increasingly used in the areas of network forensics, security and monitoring.

Fiber TAPs do not require their own power supply and are 100% passive in the network.

These models in the PacketRaven Network TAPs product family were designed as portable TAPs, but can also be installed in a 19" mounting frame in data centers using a mounting kit or on a DIN rail using a DIN rail clip.

Our passive Fiber TAPs support network speeds from 1Gbps up to 400Gbps.

With PacketRaven Network TAPs you get permanent network access without risk and provide e.g. your monitoring tools with 100% reliable network data - without introducing a single point of failure.

Because your network security tool is only as good as the data source!

	Up to 400 Gbps
	Full Network Transparency
	No impairment of Data Traffic
	100% Network Data
	Invisible for Attackers
	Flexible to Use
	Plug-n-Play
	Failure Protection on Power Loss
	Various Split Ratios
	Fast and Precise
	Support Jumbo Frames
	Made in Germany

## 1. Highlights

- Supported network speeds: 1G, 10G, 25G, 40G, 50G, 100G, 200G and 400G
- Alternative to SPAN ports - mirror 100% of traffic including FCS/CRC erroneous packets that may be discarded by SPANs.
- Invisible on the network, no IP address, no MAC address, cannot be hacked
- Guaranteed no packet loss
- 100% passive without affecting the active network connection, no additional latency
- Available in different split ratios: e.g. 50:50, 60:40, 70:30, 80:20, 90:10
- No power supply needed, 100% passive
- Plug-n-Play, no configuration required
- Support up to 16k Jumbo Frames
- Various mounting options available
- Designed, assembled, certified and tested in Germany

## 2. How does a Split Ratio work?

In order to tap data from an optical network connection, it is necessary to decouple or split off a part of the available light signal.

The split ratio is the ratio of the amount of light that is still available for the fiber network connection in relation to the amount of light that is diverted or split off to the monitoring ports of the Fiber Network TAPs.

A split ratio of e.g. 70/30 means that 70% of the light is still available for the network connection and 30% is split off for the monitoring ports.

## 3. Advanced features of the Secure Fiber TAPs

Optical Isolator

Optical Filter

Secure Fiber TAPs have both an additional optical isolator (Data Diode Functionality) and an optical filter to ensure that unwanted incoming light signals are blocked at the monitoring port to protect the network from compromise.

This protects your IT infrastructure from arbitrary or accidental tampering and ensures full data integrity.

They thus provide an additional security layer that offers increased protection against attackers and faulty configurations.

## 4. Advantages of Y-Cables

A Network TAP equipped with LC connectors has three duplex connectors, two of which are needed for looping through the network traffic to be analysed and one duplex connector for passively tapping the mirrored data for forwarding to, for example, a Network Packet Broker (NPB), an analysis system, an Intrusion Detection System (IDS), a Network Detection and Response System (NDR) or an Extended Detection and Response System (XDR).

This is the so-called monitoring port on which both the left and the right data traffic is present.

These two outputs must be fed into two monitoring ports using two transceivers in order to receive the bi-directional traffic completely, as only the receive side (Rx) of the transceivers can be used for recording.

This presents a challenge because the output of the TAP is a duplex connector and yet two separate connectors are needed on the receiving side for two individual transceivers.

To avoid this problem, it is best to use one of our special Y-cables that convert one duplex connector into two duplex connectors oriented so that the light is fed exclusively into the receive side of the transceivers.

## 5. Mounting Options

TAPs with rack mount frame bracket or DIN rail clip can of course also be used in mobile applications!

### 1. Mobile Use

Portable models - these models have no special mounting options and are primarily designed for mobile use.

PacketRaven Network TAP for mobile use

Handy & portable

### 2. Server Rack Mounting

To install our portable TAPs in a server rack, you need our server rack mounting frame with item number PRP-1U3-V2, as well as a rackmount frame mounting kit (item number PRP-1U3-CLIP) for the TAP.

The server rack mounting frame PRP-1U3-V2 provides space for up to 3 portable PacketRaven Network TAPs. Both components are available as accessories.

for up to 3 PacketRaven portable Network TAPs

TAP with rack mounting kit for  
server rack mounting frame PRP-1U3-V2

### 3. DIN Rail Mounting

As a further alternative, we also offer a top-hat rail clip for our TAPs for mounting on a TS35/7.5 DIN top-hat rail. This clip can be rotated by 180° so that the connections of the TAP can be aligned according to the respective requirements. This DIN rail clip, available as an accessory, has the item number PRP-DIN-CLIP.

Network TAP  
with DIN rail clip

## 6. Connection reliability in case of power loss

All our Fiber Network TAPs are 100% passive and do not require a power supply.

A power failure in a circuit has no effect on the TAP as it is a physical process that disconnects the network signal.

Thus, there is no impairment of the network and monitoring ports, but neighbouring devices could be affected by the power failure.

## 7. Installation

NETWORK port A is a full duplex fibre port that should be connected to one of the two network devices where network monitoring is desired.

NETWORK port B is a full-duplex fibre port that should be connected to the other side or to an adjacent network device where network monitoring is desired.

MONITOR port is a directional dual simplex port (both sides are output only) that should be connected to the input or receive side of two interfaces of one or more monitoring devices that are to capture tapped traffic.

These models in the PacketRaven Network TAPs product family are designed as portable TAPs, but can also be installed in a 19" mounting frame in data centres using a mounting kit.

## 8. Technical Specifications

TAP SPECIFICATIONS			
Operating Temperature:	-40°C – +85°C	Dimensions (WxHxD):	10.50 cm x 3.60 cm x 16.40 cm
Relative humidity in operation:	20% to 80%, non-condensing	Weight:	ca. 0.4 kg
Reliability:	GR-1221-CORE	Certifications:	CE, FCC, RoHS, WEEE
ATTENUATION VALUES			
SPLIT RATIO (OTHERS ON REQUEST)	50:50	60:40	70:30
Singlemode OS1, OS2	3.4 dB / 3.4 dB	2.5 dB / 4.5 dB	1.7 dB / 5.8 dB

## 9. TAP Models

PRP-OS2-SLL-x

PRP-OS2-DLL-x

If you need a TAP with DIN rail mounting clip, please additionally order the mounting clip **PRP-DIN-CLIP**!  
If you need a TAP with rackmount frame front panel, please order the **PRP-1U3-CLIP** front panel additionally!  
(see „Mounting Options“)

### STANDARD MODELS

All TAPs for fiber type OS2 are also OS1 compatible!

ITEM NO.	NETWORK	FIBER TYPE	WAVE-LENGTH	INTERFACE NETWORK	INTERFACE MONITORING	TAP VERSION
PRP-OS2-SLL-*	1/10/25/40/50/100/200/400G	OS2	1310 / 1550 nm	LC Singlemode	LC Singlemode	Single-TAP
PRP-OS2-DLL-*	1/10/25/40/50/100/200/400G	OS2	1310 / 1550 nm	LC Singlemode	LC Singlemode	Dual-TAP

\* respective split ratio - e.g. „70“ for a split ratio of 70:30, „60“ for 60:40, and „50“ for 50:50

### SECURE MODELS

All TAPs for fiber type OS2 are also OS1 compatible!

ITEM NO.	NETWORK	FIBER TYPE	WAVE-LENGTH	INTERFACE NETWORK	INTERFACE MONITORING	TAP VERSION
PRP-OS2-SLL-*-1310S	1/10/25/40/50/100/200/400G	OS2	1310 nm	LC Singlemode	LC Singlemode	Single-TAP
PRP-OS2-SLL-*-1550S	1/10/25/40/50/100/200/400G	OS2	1550 nm	LC Singlemode	LC Singlemode	Single-TAP
PRP-OS2-DLL-*-1310S	1/10/25/40/50/100/200/400G	OS2	1310 nm	LC Singlemode	LC Singlemode	Dual-TAP
PRP-OS2-DLL-*-1550S	1/10/25/40/50/100/200/400G	OS2	1550 nm	LC Singlemode	LC Singlemode	Dual-TAP

\* jeweiliges Split Ratio- z.B. „70“ für ein Split Ratio von 70:30, „60“ für 60:40, „50“ für 50:50

## 10. Accessories

### INSTALLATION & MOUNTING

ITEM NO.	DESCRIPTION
PRP-1U3-V2	Server rack mounting frame for 3 portable TAPs
PRP-1U3-BP-V2	Blank plate for mounting frame PRP-1U3-V2
PRP-1U3-CLIP	TAP rackmount frame bracket for server rack mounting frame PRP-1U3-V2
PRP-DIN-CLIP	TAP DIN rail mounting clip

PRP-DIN-CLIP

PRP-1U3-V2

PRP-1U3-BP-V2
